HTML Guide: Lists

Element	Code	Note
Ordered List	`<ol></ol>`	Creates a numbered list
Type attribute	`<ol type="a|A|i|I|1"></ol>`	Better to use CSS Specifies type of number
Start attribute	`<ol start="n"></ol>`	"n" = the integer at which to begin list
Reversed attribute	`<ol reversed></ol>`	Is a boolean attribute. If present (true), it indicates that the list is a descending list (..., 3, 2, 1). If the attribute is omitted (false), the list is an ascending list (1, 2, 3, ...).
Unordered List	`<ul></ul>`	Creates a bulleted list
Type attribute	`<ul type="disc|circle|square"></ul>`	Obsolete use CSS to define an unordered list's bullet. Specifies type of bullet
Menu List	`<menu></menu>`	Like the <menu> element, the <menu> element will produce an unordered list. The main difference is that <menu> is a semantic element intended to contain a list of interactive items, such as links.
Listed Item	`<li></li>`	Nested only within an Unordered or Ordered list or a Menu Defines an item in an Unordered or Ordered list
Value attribute	`<li value="8">`	The **value** attribute can only be assigned to the LI element if its parent element is the OL element. The value of the **value** attribute must be a valid integer.
Description/Definition List	`<dl></dl>`	Creates a Description or Definition List
Description/Definition Term	`<dt></dt>`	Nested in the Description List element Specifies the term that is to be defined or described
Description/Definition	`<dd></dd>`	Follows the Description Term element Specifies the DT's definition or description

```
<h2>Listing my favorite colors</h2>

<ol>
   <li>Royal Blue</li>
   <li>Maroon</li>
   <li>Hunter Green</li>
</ol>

<h2>To do list in no particular
order</h2>

<ul>
   <li>grocery shopping</li>
   <li>pay bills</li>
   <li>call brother</li>
</ul>
```

```
<h2>Simple Glossary</h2>

<dl>
   <dt>Strong Element</dt>
   <dd>Indicates strong importance for
   its contents</dd>
   <dd>The relative level of importance
   of a phrase is set by its number of
   ancestor strong elements.</dd>

   <dt>EM element</dt>
   <dd>Indicates stress emphasis of its
   contents</dd>
</dl>
```
